## Education

### Amruta Institute of Engineering and Management Sciences

*Bachelor of Engineering in Computer Science Engineering*

CGPA: 8.14/10.0

**Aug 2019 – Aug 2023**

*Bangalore, Karnataka*

### M S Ramaiah Institute of Technology

*Master of Technology in Computer Science Engineering*

CGPA: 8.9/10.0

**Dec 2024 – Aug 2026**

*Bangalore, Karnataka*

## Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Operating System
- Computer Networks

## Experience

### Target

**Aug 2026 – Present**

*Apprentice – Data Analyst, Merchandising (RTE Team)*

*Bangalore, Karnataka*

- Supporting the Merchandising RTE team with data analysis and business reporting.
- Using SQL to retrieve, query, and analyze data to support business requirements and decision-making.
- Creating Power BI reports and visualizations to generate business insights and support data-driven decisions.

### Caze Labs

**Sep 2025 – Feb 2026**

*Intern*

*Bangalore, Karnataka*

- Developed and executed Ansible Playbooks to automate Linux server administration and configuration management tasks.
- Implemented inventory management and deployment workflows for efficient infrastructure provisioning.
- Verified deployments through testing and troubleshooting, ensuring reliable and consistent system configurations.
- Gained hands-on experience with Linux, Git, shell scripting, and infrastructure automation following DevOps best practices.

## Projects

### Real-Time Elephant Detection Using Aerial Images and Deep Learning Techniques | *Python* | GitHub **April 2026**

- Developed a real-time elephant detection system using a hybrid YOLOv10 and MobileNetV2 CNN framework on aerial imagery.
- Prepared and annotated a custom elephant dataset, applying preprocessing and augmentation techniques to improve model performance.
- Utilized YOLOv10 for object localization and MobileNetV2 for verification, reducing false-positive detections.

### Vehicle Parking System | *PHP, MySQL, JavaScript, SCSS, Bootstrap* | GitHub

- Developed a vehicle parking management system to manage parking for different types of vehicles, including two-wheelers and three-wheelers.
- Implemented parking management features to track parked vehicles and manage vehicle entry and exit times.
- Built the application using PHP, MySQL, JavaScript, SCSS, and Bootstrap.

### GST E-Billing App | *Java, Android Studio* | GitHub

**November 2022**

- Developed an Android application to simplify GST bill generation and management.
- Designed an intuitive user interface with multiple activities for seamless navigation.
- Implemented features for efficient GST bill generation and management.

### Melanoma Cancer Detection | *Python* | GitHub

**March 2023**

- Developed a deep learning-based system for detecting melanoma from skin images.
- Used a Convolutional Neural Network (CNN) to analyze skin images and classify melanoma-related predictions.

## Workshops

---

### Google Cloud Ready Facilitator Program | *Google Cloud* | Certificate

- Completed the Google Cloud Ready Facilitator Program through hands-on cloud learning activities and skill development.
- Participated in the Learn to Earn Cloud Challenge and completed 50+ hands-on labs.
- Gained practical exposure to Cloud Architecture, Big Data, Cloud Essentials, and Cloud Security concepts.

## Technical Skills

---

**Languages:** Python, Java, C, HTML/CSS, JavaScript, SQL

**Developer Tools:** VS Code, Eclipse, Google Cloud Platform, Android Studio

**Technologies/Frameworks:** Spring Boot, Hibernate, Linux, Jenkins, GitHub, REST APIs

## Certificates

---

Data analytics on AWS (Coursera)

Software Engineering Virtual Experience (JP Morgan )

Salesforce Developer(Salesforce)

Google Cloud(Badges)
